

Juliette Zaccour

📍 Oxford, UK ✉ juliette.zaccour@oii.ox.ac.uk 🔗 <https://biksil.github.io/zaccour/>

Summary

PhD Candidate in Social Data Science at the Oxford Internet Institute, with a background in information studies and humanities. My research investigates the impact of data sharing practices and privacy-enhancing technologies on public interest research, the power dynamics behind AI systems, and the impact of AI on science.

Research Areas

Human-centered computing, Human-computer interaction, Privacy-enhancing technologies, AI evaluation, AI governance, AI in science.

Education

PhD in Social Data Science 2023 – 2026

Oxford Internet Institute, University of Oxford

- Advised by [Dr. Luc Rocher](#) at the [Synthetic Society Lab](#)

Master in Information 2022 – 2023

Faculty of Information, University of Toronto

- Human-Centered Data Science concentration
- Graduate student researcher at the [HCDS Lab](#)
- *Master's thesis*: Towards a Human-Centered Approach to Data Science in Healthcare: An Exploration of Methods. Supervised by [Dr. Shion Guha](#)
- *Selected courses*: Programming for data science; Statistics; Data visualization; Experimental design; Data analytics; Machine Learning; Natural Language Processing; Research methods; Information systems, services and design; Systems thinking; Human values in data science

Bachelor of Arts 2017 – 2021

Faculty of Arts, McGill University

- Major concentration in **Liberal Arts**, Minor concentration in **Psychology**, Minor concentration in **East Asian Studies**.
- Academic exchange at Sophia University, Tokyo (2019)

Experience

Research Scientist Intern Oxford, UK

Aioi R&D Lab

July-October 2025

- **Data privacy**: (i) consulted on requirements for privacy and fairness evaluations, (ii) conducted comparative synthetic data evaluations, and (iii) built a prototype application to demonstrate synthetic data generation and evaluation to non-technical stakeholders.
- **AI Governance**: (i) reviewed existing governance tools and AI risk taxonomies, (ii) developed a socio-technical taxonomy of AI risks, and (iii) designed a database to structure AI incident reports.

Teaching Assistant

Oxford Internet Institute, University of Oxford

Oxford, UK

January-March 2024

- MSc course [Fairness, Accountability and Transparency in ML](#).
- Led weekly tutorials and assisted students on formative assignments and final project proposals.

Graduate Researcher

Human-Centered Data Science lab

Toronto, Canada

January 2022 - June 2023

- Data analysis, modelling and visualization for research projects in social work and healthcare.

- *Healthcare*: Conducted cluster modelling to uncover subtypes of long COVID based on presentations of symptoms; communicated our findings to clinicians through a written report.
- *Social Work*: Analyzed survey data using exploratory factor analysis and regression modelling to identify underlying characteristics of resilience in adolescents.

Research Student

Toronto Human-AI Research School

Toronto, Canada

Summer 2022

- Analyzed clinical data (wearables logs, Electronic Health Records, surveys) from long COVID patients, in partnership with non-profit healthcare system *Parkview Health*.
- Co-authored an article presented at CHI'2024 exploring patients' lived experiences and recovery trajectories.

Research & Content Manager

ACT Responsible

Paris, France

Sept 2021 - July 2022

- Led a data analysis project exploring the evolution of creative advertising.
- Shared key insights with industry actors through an exhibition at the 2022 Cannes Lions International Festival of Creativity, visited by thousands of communication professionals.
- Consulted on survey design to assess corporate responsibility practices in international advertising agencies.
- Assisted in training two interns on database maintenance and community management.

Digital Event Coordinator (Intern)

ACT Responsible

Paris, France

January-July 2021

- Data entry and content curation for the organization's media database.
- Content creation and communications, including social media, newsletters and press releases.
- Coordinated a digital industry event with art directors, web developers and international agencies.

Research Assistant

.TXTLAB, McGill University

Montreal, Canada

January-November 2018

- Data collection, entry, cleaning and analysis for cultural analytics research projects.

Other activities

- Reviewer
 - ACM Conference on Fairness, Accountability, and Transparency (FAccT) (2025, 2026)
 - International Association for Safe & Ethical AI (IASEAI) Conference (2025)
 - Big Data & Society (2024)
- Women's Welfare Officer at St. Catherine's College [MCR](#) (2023-2025)
- Machine Learning for Social Good researcher at the [Future Impact Group](#) (2023-2024)
- Photographer (2017-2018)

Academic awards

St. Catherine's Graduate Scholar

2025-2026

Scholarship awarded by Oxford's St. Catherine's college (1 awarded per year)

Oxford Women in Computer Science Society Scholarship

2025

Scholarship awarded by OxWoCS for conference attendance

Light Senior Scholarship

2024

Scholarship awarded by St. Catherine's College

Clarendon Scholar

University of Oxford,

Full scholarship for a DPhil at the Oxford Internet Institute

2023-2026

Dean's Honor List

McGill University, 2019

Top 10% of the Faculty

Golden Key International Honor Society member

McGill University, 2019

Membership offered to the top 15% students of the Faculty

Publications

Contextualizing research integrity loss under synthetic data access

Under Review

Access Denied: Meaningful Data Access for Third-Party Algorithm Audits

In Proceedings of the CHI Conference on Human Factors in Computing Systems (CHI'25)

Juliette Zaccour, Reuben Binns, Luc Rocher. doi.org/10.1145/3706598.3713963 

Received an **Honorable Mention Award** (top 5%)

Charting the COVID Long Haul Experience: A Longitudinal Exploration of Symptoms, Activity, and Clinical Adherence

In Proceedings of the CHI Conference on Human Factors in Computing Systems (CHI'24)

Jessica Pater, Shaan Chopra, Jeanne Carroll, **Juliette Zaccour**, Fayika Farhat Nova, Tammy Toscos, Shion Guha, and Fen Lei Chang. doi.org/10.1145/3613904.3642827 

Hackathons & ML competitions

ML Forecasting Competition — Innovation Award & Performance Award

November 2023

Canadian Statistical Sciences Institute

- Developed a classification model to predict winners in horse races, using feature engineering to introduce performance scores based on historical data, horse characteristics and race track condition.
- Achieved the highest accuracy.

Crop Yield Estimate Challenge — 3rd place

December 2023

Digital Green & Zindi

- Developed an ensemble ML model predicting rice yield among smallholder farmers, achieving 3rd place on model accuracy.
- Collaborated with Digital Green following the competition to deploy the model in a web app and test its accuracy with new data.

Data Science Hackathon — 1st place

March 2023

Government of Canada & University of Toronto

- Developed an explainable algorithm detecting errors and fraud for a governmental family benefits program, achieving the highest accuracy and presenting a prototype demo and cost-savings analysis.

Technical skills

Python for data science (data analysis, statistical analysis, Machine Learning, data visualization)

Research software development (Experiments, Git, ...)

Database modelling

Figma, Adobe Lightroom, Photoshop, Premiere Pro (information visualizations, web design, editing)

Languages

English, French, Spanish (intermediate), Japanese (beginner)
